# Innledning

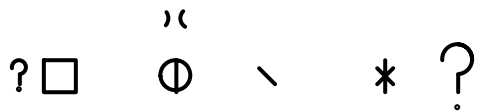

Denne boka handler om stjerner.

Sola vår er en stjerne.

3

Hva er en stjerne?

En stjerne består av

glødende

gass.

$\langle \rangle^{\vee} !!$     $\Phi$     $| \rangle$     $\setminus$     $*$

Glovarm   gass   fra   en   stjerne.

4

---

$||| \text{I}$

**Størrelse**

---

$\times$     $\text{)}($     $\wedge$     $\vee$   
 $*$     $\cdot \vee$     $\Phi$     $\text{I}$

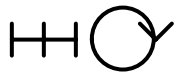

Stjerner   kan   være   store

$+$     $\vee$   
 $\text{I}$

og   små.

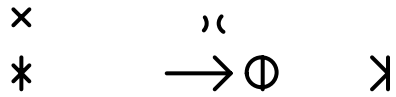

5

---

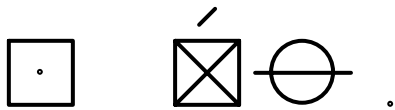

**Alder**

---

**Stjerner blir til**

**i verdensrommet.**

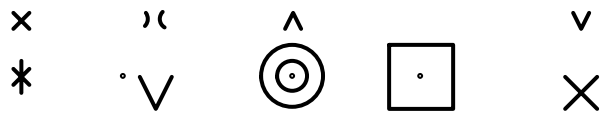

---

**Stjerner blir til Det likner på et fyrverkeri.**

6

---

**Stjerner kan lyse i mange**

**millioner år.**

7

**Lys**

---

**Stjerner**

**gir**

**fra**

**seg**

**lys.**

**8**

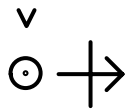

---

**Stjerner**

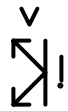

**skinner**

**klart**

**og**

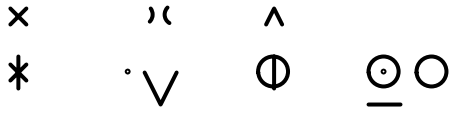

**strålende.**

**9**

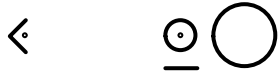

---

**Farge**

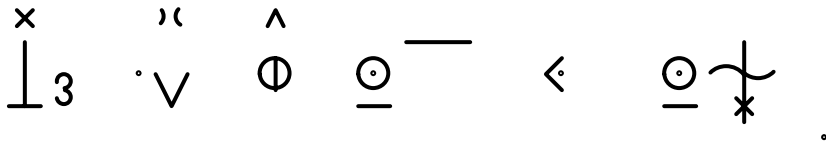

**Stjerner kan være røde**

**eller gule.**

10

---

**De kan være blå eller hvite.**

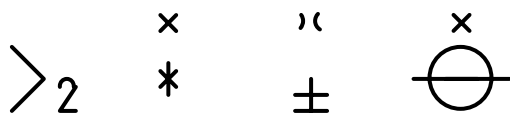

11

---

**Stjerner og planeter**

---

**Noen stjerner har planeter.**

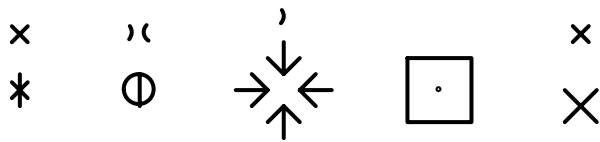

Vår sol er en stjerne med ni planeter.

12

---

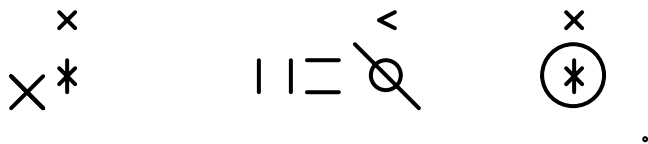

### Stjernegrupper

Stjerner er samlet i grupper.

13

---

Stjernegrupper kalles gallakser.

14

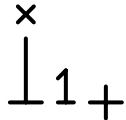

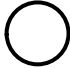

---

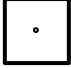

Vår gallakse heter Melkeveien.

15

---

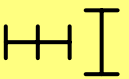

Vår sol er en gul stjerne.

M.

i Melkeveien.
